Objective

Full stack software engineer with 8 years of experience building scalable web and mobile applications with (Typescript | React.js | React-Native | Node | Express | MongoDB | NEST) technologies. I'm looking for a job where I can use my strong organizational skills and ability to work well with people effectively.

I feel that a man can achieve anything in the field if his technical skills are excellent. A man with this attitude of doing anything will never face a problem. I believe I am capable of achieving anything, whether it is because of my mindset or my abilities.

Experience

CodeSaucers, Islamabad — Senior Full Stack Engineer (Freelancer),

As a Senior Full stack Engineer, my responsibility is to engage with clients, develop projects, and manage other team members

June 2023 - Present

- **Direct Rent:** I added new features and resolved issues with the map and email functionalities. Additionally, I created the admin module. (Node, React, API integration)
- **Rasa Chatbot:** I created a chat box using React and implemented real-time chat with socket.io. We used React, Typescript, Mobx, vanilla-extract, API integration and Socket.io in this project.
- **Stellar Disbursement Platform:** Successfully set up and deployed the Stellar Disbursement Platform (SDP) on a Linux server using Docker, configuring Nginx for reverse proxy and SSL security
- **ATM Token Wallet & Freedom Pay Wallet:** Developed and published both apps on the App Store using Capacitor and Next.js, integrating the Stellar API for secure blockchain transactions. ATM(<https://apps.apple.com/pk/app/atm-token/id6526489486>) Freedom(<https://apps.apple.com/pk/app/freedom-pay/id6448116005>)

LottieFiles, California USA — Full Stack Engineer (Plugin) (Consultant - Fulltime - Remote),

As a Full Stack Engineer Plugins team, I am responsible for creating Lottie Integration to different platforms like Shopify, WordPress, Google Workspace and many more. Below I have listed most of my contributions to LottieFiles.

Jan 2022 - June 2023

- **i18n-js CLI:** Companywide CLI tool that downloads translation files in root of your repository based on provided Phrase.com API, Secret Keys and Locale. (JavaScript, TypeScript, NPM, Jest, react-testing-library, Node, eslint, API integration)
- **LottieFiles for WordPress (Plugin):** Developed Gutenberg Block for WordPress Community to easily add Lottie Animation on their WordPress websites. (React, TypeScript, Tailwind, apollo-graphql, graphql, graphql-request, urql, eslint, Php, MySQL, API integration) <https://wordpress.org/plugins/lottiefiles/>
- **LottieFiles for Microsoft M365:** Added features and bug fixing on M365 plugin. (React, Typescript, graphql, urql, apollo-graphql, eslint, API integration) <https://appsource.microsoft.com/en-us/product/office/WA200003732?tab=Overview&exp=ubp8>
- **LottieFiles for Bubble.io:** Developed Lottie Bubble for Bubble.io community to easily add Lottie Animation to their Websites and Application. (Javascript) <https://bubble.io/plugin/lottiefiles-1676280573614x891677842206097400?ref=lottiefiles.com>

- **LottieFiles for Shopify:** Developed Lottie Block Extension for Shopify community. Shopify user can now easily add Lottie Animation to their Stores. (Javascript, Liquid, React, TypeScript, react-query, Node, Express, Shopify Admin API integration, Shopify Polaris, apollo-graphql, API integration)
